#### DESCRIPTION OF THE REQUIREMENT

To improve energy efficiency, the Village of Salmo is looking to install an Air Source Heat Pump. The Village office currently uses an older Lennox 105 MBH input (79.8 MBH output) natural gas furnace to provide heating to the building.

The new heat pump would provide the Village office with a high efficiency source of heat and provide cooling in the summer.

All aspects of each quotation are to be included in the proposal, cost including labor and supplies. Bids must detail the work required and supplies required. Interested proponents that are qualified to supply and complete this scope of work are welcome to participate in this request for quotation process.

#### TIMELINE

This project would be completed by January 31, 2024.
